

**Mission:**

The mission of providing education to remote areas focuses on bridging the gap in educational access and quality between urban and rural settings.

**Aims & Objectives:**

- Leveraging technology like online learning platforms, mobile schools, and digital resources to reach students in remote areas.
- Enabling individuals in remote areas to acquire knowledge and skills for personal growth and community development.
- Supporting learners of all backgrounds, abilities and learning styles.
- Raising awareness of non-traditional and diverse career opportunities.
- Bringing classroom to your doorstep.

**Initiatives:**

- Digital Mode of Learning aims to enhance teaching and learning through technology integration.
- Mobile schools or “ m-learning” bring education directly to remote communities, often incorporating digital tools.
- Platforms like Zoom & Google Meet are provided for easily accessible and high interactive education through digital learning materials.

**Advantages of digital Mode of Learning:**

- Tools like smartboards or tablets make learning more interactive.
- Lowering the cost of travel, tuition and books by offering affordable technology-driven education.
- Flexible access to study materials and live classes.
- Education that uplift not just individual but entire communities.
- Allowing parents to track progress, attendance, and performance through the Shiksha App and Portal
